

BORDERS

POLYBORD

STRENGTHS

- Easy to install with steel nails (a cement base is not required)
- Connectable without any additional parts (tongue and groove)
- Can be placed in a curved form after cutting the connecting bridges
- Possibility to attach electrical cable or garden hose
- UV-resistant

TECHNICAL INFORMATION

DIMENSIONS BORDERS

- L x W x H : 100 x 0,6 x 10 cm
- Hauteur de travail : 8,5 cm

DIMENSIONS STEEL NAILS

- Height : 27,5 cm
- Diameter : 8 mm
- Recommended number : 3 pieces per running meter

INSTALLATION

OPTION 1 : INSTALLATION IN STRAIGHT LINES

Create the outline.

Connect the borders by means of the tongue and groove system.

Place the borders using steel anchors (3 pieces per running meter).

OPTION 2 : INSTALLATION IN BENT LINES

Create the outline.

Cut the required amount by connecting bridges, using pruning shears or a wire cutter.

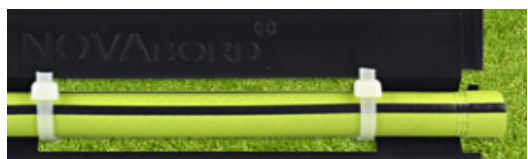

Place the border in the desired position and use the anchors to fix it.

All connecting bridges must be cut in order to make a full circle (e.g. around a tree).

INSTALLATION OF ELECTRIC CABLE OR GARDEN HOSE

Pour fixer les câbles, nous recommandons l'utilisation de colliers de serrage.
